# Work Experience

## **System Administrator / NetSuite Developer / Marketing**

**Global Tech LED** – <http://www.globaltechled.com>

August 2014 – Present

Migrated and managed a growing multi-million dollar company with over 50 employees from their outdated business software to NetSuite cloud ERP software. From data cleaning and migration to workflow and form customization including SuiteScript to meet department and manufacturing requirements. Saved searches with complex formulas for calculating commissions and building internal reports. Additionally, I developed web applications for integrating printing of serial numbers with NetSuite. Developed a BootStrapped Javascript web application for calculating Return on Investment from existing commercial lighting products to Global Tech LED's retrofit lighting product. Started as graphic designer in marketing department and developed website and style standards used in all print and web marketing.

## **Digital Developer**

**Green Secure Energy Solutions**

December 2012 – January 2014

Developed website, printed marketing material, and created FileMaker database solution. Installed and maintained wireless lighting solutions and cloud-based lighting controlling software.

## **Senior Graphic Designer**

**Cecil's Copy Express Naples**

September 2010 – December 2012

Designed print products on digital and offset printers. Job details included design and production of all print products for local government and local school systems.

# Projects

## **NetSuite Implementation, Scripting, and Administration**

Cleaned and migrated data as well as diagrammed business processes for LED manufacturing company. Trained each department, customized roles, dashboards, scripting, manufacturing workflow, developed custom reports, and administration.

## **Web Development**

Developed PHP, JS, JQuery, BootStrapped web application calculator for transitioning from traditional metal halide lighting to a LED lighting retrofit. Built internal web applications for printing of serial numbers from NetSuite and other internal functions. Developed Wordpress and Joomla websites for an array of different clients.
